

RESUME

Md. Habibur Rahman

House no.- 396, (2nd floor), Sony Villa
South Kafrul
Dhaka-1206
Phone- +8801717565568
Email: habiburcs@gmail.com

OBJECTIVE

Looking for a software engineering position where to learn and implement academic programming skill and become established in future as a successful software engineer in private sector. Also look for the benefit of the organization and the nation.

EDUCATION

Certifications	Details
B.Sc. in Computer Science & Software Engineering	Institution: American International University- Bangladesh CGPA: 3.39 out of 4.00
H.S.C	Institution: Niamatpur College CGPA: 3.70 out of 5.00, Group: Science Board: Rajshahi, Passing Year: 2008
S.S.C	Institution: Niamatput High School CGPA: 4.38 out of 5.00, Group: Science Board: Rajshahi, Passing Year: 2006

SKILLS

Java Technologies

- **JavaSE:** Java I/O, Java Swing, Graphics & Java 2D, Generics, Collection, Applet, Multithreading, JDBC
- **JavaEE:** Servlet, JSP, EJB, JSTL
- **FrameWorks:** Spring FrameWork, Spring MVC, Hibernate, Maven

Other Programming Languages

- C, C++, C#

Databases

- Oracle & PL-SQL, MySQL, SQLite

Web Technologies

- PHP, HTML, CSS, BootStrap, JavaScript, Ajax, XML

Tools Used

- NetBeans, Eclipse, Spring Tools Suit, IntelliJIdea, Oracle SQL Developer, VisualStudio

Other's Skill

- Android App Development
- PHP CodeIgniter, Unified Modeling Language(UML)
- Comfortable with Linux & Windows

CERTIFICATION

- Certificate on 4 month long android trainer training course jointly organized by ministry of ICT & EATL.

ACADEMIC PROJECTS

Project 1: Point of Sales, Implemented with J2SE & MySQL

Java point of sales has multilevel user access. Such as Cashier, Brunch Manager, Admin, Super Admin etc. Different user has different access level for controlling the business. User can Import product, sales product. Add new user by admin, add new customer, add new brunch etc.

Project 2: Online Shoppinh Cart & Library Management, Implemented with J2EE & Oracle

Here an user can purchase a product from online. User can view product list and add to cart. Finally user can checkout the order by login or registration of the system. Login and registration page has captcha verification. Captcha created by raw code without any third-party library. Project created with a MVC architecture.

Library Management System design same as MVC pattern. Admin can add Author, Book, user and issue book for user. Users are able to search for a book.

Project 3: Online Face detection & Recognition, using J2EE , Oracle & OpenCV

In this project our system can capable to face detect from a picture. We store original image in server side Beside this we resize image in three different size. Original, Thumbnail and photo frame size [ex. Facebook photo viewer size]. We also store the XY co-ordinate of faces from images and store to database. We take survey from user about a face and try to show the user of his/her other picture from system by a machine learning process. User can download their original picture too. System need to registration or login before use.

Project 4: Club Management System Using PHP & MySQL

A centralize club management system for AIUB. A central admin can create new club and it's president. Each President can perform to create event, approve or disapprove of new user. Outside president can not access to other clubs. User can register and send request to join a club. This system built using HTML, CSS, PHP, MySQL, javascript & JQuery.

Project 5: Air Ticket Management System using PHP & MySQL

This system is common for other airline system. There are three types of users in this system. Admin, Register & Unregister user. Admin can create flight schedule, route, add airport, change the time schedule. Registered users are able to buy ticket. Unregister user can see flight information, route & other public information. Routs are show using google map implementation. Ajax, JQuery & javaScript also used in this project.

Project 6: Alien shooter Game & Kids tutoroal Apps in Android

A small android game. Alien comes from sky.You have to shoot the aliens from rocket. Your score will high if you shoot the alien otherwise you will lost.

Kids can learn from kids tutorial app. The app has graphical pictures of national thing [Ex. national bird, fruit, animal etc.] & sound to learn.

Personal Profile

Name:	Md. Habibur Rahman
Father's Name:	Md. Israel Hossain
Mother's Name:	Mst. Mohasina Begum
Permanent Address:	Village- Niamatput P.O.+P.S.= Niamatpur District- Naogaon
Date of Birth	OCT 08, 1989
Nationality:	Bangladeshi
Sex	Male
Marital Status:	Never Married
Religion:	Islam
