Apply for	: Ruby On Rails Internship

INTRODUCTION

I'm a last year student of Information Technology faculty at Hanoi University of Science and Technology. My major is Software Engineering, and I really like programming about websites so I have decided choose this school.

- Strengths:
    - I'm a laborious person, have a personal responsibility and i am very passionate about programming.
- Weekness:
    - Sometimes I allocate time for works still irrational, so this always make me feel dissatisfy with myself.
- My favorite:

o Listen to music, watch movies about comedy and play badminton with my friends.
o Code the programming and learn foreign language while in free time.

OBJECTIVE

- To find a good company to become internship about Ruby On Rails.
- Develop my skills with developent of company, i want to learn and research in the profession environments as at company.
- To be a good developer about Ruby language in three years.
- To be get a promotion in the future.
